Shiraz, Iran

PROFILE

I am a DevOps Engineer at Palapal Co., where I manage the back-end and infrastructure of the platform. I have more than 5 years of experience in web development, using technologies such as Laravel, Angular and Vue. Previously, I was a Full Stack Developer at Appsaz, where I led the back-end development of more than 12 Wordpress plugins and participated in the development process of more than a dozen applications. I am passionate about creating scalable, secure, and reliable solutions. I enjoy working with a diverse and collaborative team that shares my values and goals of delivering high-quality products and services.

EXPERIENCES

H Hyper — 2017 - 2018

As back-end developer using Laravel and Vue.

Bonnyto; Progland — 2018 - 2019

Co-founder and CTO. Developed back-end as a set of micro-services using Lumen. In addition developed the mobile application using Ionic and Vue.

Appsaz; Palapal Co. — 2019 - 2022

WordPress plugin development, iOS and Android application development using Ionic and Angular. In addition developed some native plugins for Cordova and Capacitor platforms.

LiFA; Palapal Co. — 2021 - Present

Senior full-stack developer of LiFA application, using Laravel and Ionic. In addition worked as the infrastructure manager.

SIDE PROJECTS

Shiraz Takhfif — 2024

Consultation on API performance issues and DevOps pipeline efficiency.

GMJ — 2022

OJS Maintenance and Support.

Rambody — 2023

Developed payment gateway using NestJS and MongoDB.

Visor Festival — 2016 - 2018

As website designer and technical support.

SKILLS

Linux

Using Linux as my daily drive since 2014 and maintained numerous Linux servers. Lots of experience using both RHEL and Debian family of distributions.

Laravel

Using Laravel since 2017 in various projects. Experience of development with TALL stack and Inertia since 2021. And used Lumen to develop micro-services in the past.

Angular

Angular developer since 2018 mainly in combination with Ionic.

Docker

Using Docker since 2018 mainly on production servers.

WordPress

Lots of experience in child theme and plugin development since 2018.

Vue

Using Vue 2 since 2018 mainly in combination with Laravel to develop management dashboards.

Nest JS

Started learning and using NestJs in combination with MongoDB in 2023.
